

AGR – Campaign group for healthier backs

Award-winning models

“In many cases back pain can be avoided!”

The statistics speak for themselves. Back pain is often a result of the way we lead our lives, e.g., due to a lack of movement and/or because of sitting, lying, lifting and carrying for either too long or, quite simply, incorrectly. The „Aktion Gesunder Rücken e. V.“ (campaign for healthier backs) is dedicated to the issue of back pain. The campaign aims to promote research into how to prevent back pain as well as the communication of research findings in order to help fight endemic back pain.

The campaign is supported by and uses the know-how of medical experts as well as various specialist companies. The independent AGR quality seal represents a pioneering step for all consumers. The customer can rest assured: Products bearing the AGR quality seal are back-friendly. The Sedus office swivel chairs and motorised height-adjustable desks shown here have been awarded the AGR quality seal by a panel of experts from Germany’s two leading back

training associations, the „BdR e.V.“ (German Association of Back Training Facilities) and the „Forum: Gesunder Rücken – besser leben e. V.“ (The forum: a healthy back for a better life) as well as experts from the occupational health sector.

Further details on the quality seal are available from:

Aktion Gesunder Rücken e. V.

Innovative Sedus Technology

The **dynamic backrest** guarantees maximum freedom of movement combined with constant upper body support.

The **height-adjustable lumbar support** enables tailored and precise support of the spinal column.

Adjustment of the **seat tilt** by 4 degrees.

The **sliding seat** ensures great sitting comfort for users of all heights.

The **seat-depth springing** offers maximum suspension in every sitting position.

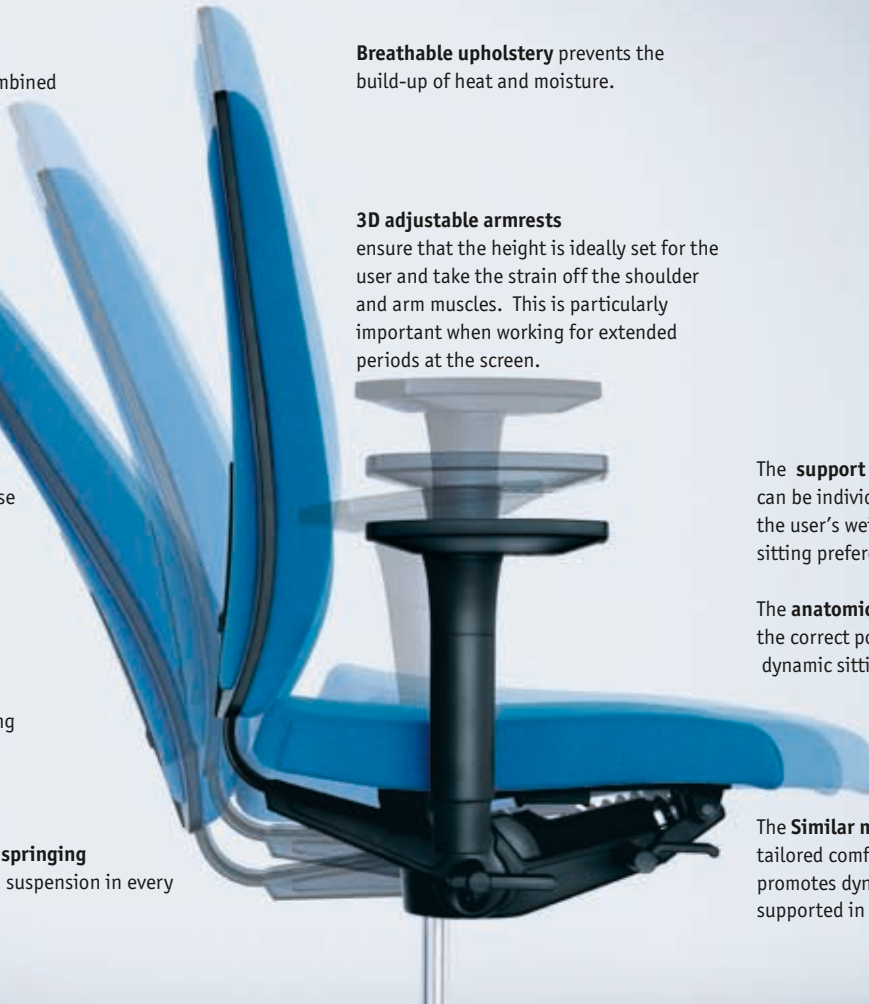

Breathable upholstery prevents the build-up of heat and moisture.

3D adjustable armrests ensure that the height is ideally set for the user and take the strain off the shoulder and arm muscles. This is particularly important when working for extended periods at the screen.

The **support resistance of the backrest** can be individually set to accommodate the user's weight, size and sitting preferences.

The **anatomically formed seat** promotes the correct posture for dynamic sitting.

The **Similar mechanism** guarantees tailored comfortable movement and also promotes dynamic sitting. The back is supported in every single position.

match

Characteristics

Sedus match stands for quality and performance at a great price. The streamline silhouette gives Sedus match its unmistakable character. The perfectly shaped backrest with its adaptable slat structure, its gentle flexibility and the generous upholstered seat ensure outstanding sitting comfort. The large selection of fabrics and the option of a non-upholstered backrest further enhance the design diversity. Thanks to the patented quick adjustment feature, the backrest pressure can be reliably adapted to the user's weight with just one hand movement – ideal for multi-user workstations.

match up

Characteristics

match up scores the ultimate match point – in terms of ergonomic quality, aesthetics, performance and an unbeatable price. Making it the true all-rounder for every situation: be it high-concentration work in the back office, heated debates around the team table or in its classical role as a multi-user office chair.

Thanks to the patented Sedus “Similar” mechanism, every single adjustment requires little more than the flick of a wrist.

And when the pace of work begins to heat up, you’ll find just the adjustment you need – e.g., depth-adjustable lumbar support, adjustable seat depth or head rest.

match up product family

Swivel chairs, 4-leg and cantilever models

Characteristics

With netwin, everything sits well – the design, the finish, the ergonomics. And all for a price which will make your transition to Sedus quality seating smoother. Visually and functionally netwin fits in equally well into any surroundings: with the breathable backrest membrane available in seven different colours and three variations on the model, designing any space is a breeze – and customizing netwin for multi-user workstations is just as easy.

Task chairs, 4-leg and cantilever models

yeah!

Characteristics

yeah! is a very affordable way to enjoy the Sedus sitting experience. yeah! combines a no-nonsense, restrained language of form with the emphasis on eye-catching details, such as the “framed” backrest.

Ergonomically outstanding, as you would expect from Sedus, yeah! also has a less expected feature: the innovative quick adjustment system for adaptation to each user’s weight.

yeah! is easy and safe to operate using one hand, which makes it the ideal choice for multi-user workstations.

yeah! product family

Swivel chairs, 4-leg and cantilever models

early bird

Characteristics

Can good design put you in a good mood? The welcoming appearance of early bird provides the answer.

The open, balanced styling reflects its functional qualities – early bird is technically advanced, mechanically durable and the product of high-quality craftsmanship. Ergonomically, early bird offers exceptional comfort for anyone who works a lot sitting down. What's more, early bird simplifies the job of furnishing an office because it comprises a highly functional and good-looking range for every type of use.

black dot

Characteristics

black dot has a stimulating effect in every sitting situation. The dorsokinetic backrest and the new, breathable and moisture-permeable upholstery provide maximum freedom of movement and create a real feel-good factor. The design of black dot is equally outstanding. Its elegant lines, colour concept and attention to detail give any room its own individual character – as a stand-alone chair or as a team comprising swivel chair, 4-leg model and cantilever. In a word: black dot is a milestone in the new emotional office culture.

open mind

Characteristics

open mind embodies the Sedus concept of dynamic sitting – with no compromises. The eye-catching central feature of open mind is the integral back frame and backrest support – with a choice of semi-transparent, breathable membrane covering or fabric or leather finish.

The striking design of open mind is complemented by its exemplary ergonomic qualities: the large opening angle (over 32°) permits maximum freedom of movement and a comfortable sitting-lying posture for relaxation.

open mind product family

Swivel chairs, cantilever, ottoman

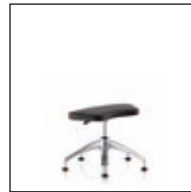

open up

Characteristics

With an opening angle of up to 45°, open up redefines freedom of movement in the office. Another special ergonomic feature of open up is the flexible backrest connection – the dorsokinetic mechanism. It means that the backrest adapts directly to all your rotational, sideways and backward movements. The large opening angle permits an almost horizontal working posture – ideal for relieving strain on the spinal column and for relaxing (power napping). As unusual as its gracefully slender design is the integral concept of open up, which includes an ottoman and also a work assistant.

mr. charm

Characteristics

mr. charm boasts more than 1 billion variants. Nothing could better describe its versatility and adaptability, which allow your every wish to be fulfilled. Apart from its enormous ergonomic potential, mr. charm is also visually stunning.

Its design is full of character – accentuated by a variety of striking armrest shapes – making mr. charm a welcome sight in any surroundings: whether modern or classically elegant, leather or fabric, back office or front office, or for working at home.

mr. charm product family

Swivel chairs, 4-leg and cantilever models, ottoman

mr. 24

Characteristics

Nothing gets the better of mr. 24 – not even a body weight of 200 kg. The chair has been designed for the most extreme round the clock continuous loading conditions typical of 3-shift 24 h operation, e.g., in control and monitoring rooms.

Ergonomics, material quality, mechanical durability, sitting comfort: all factors comply with the highest quality standards.

This makes mr. 24 a true safety factor for such workstations.

mr. 24 product family

Swivel chair

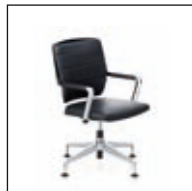

crossline

Characteristics

crossline stands for a whole new sitting experience. The drive and centre piece of this swivel chair is the patented “Similar-Plus” mechanism, which ensures exceptionally smooth movements for dynamic sitting. Even the “shirt-pulling” effect is practically a thing of the past. The backrest provides ideal support to the hip bone area with its mobile, flexible upholstery, gently absorbs movements of the spine and always maintains contact with the back. The controls are intuitive to use, are easy to reach and feature distinct symbols. That even makes adjusting the settings fun.

crossline product family

Swivel chairs, partner chairs, cantilevers, 4-leg models

of course

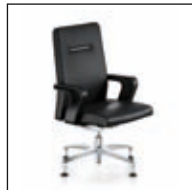

Characteristics

of course is a winner – just like its owner. It embodies the ultimate in swivel chair design technology. The ever-increasing importance of correct sitting in the Sedus philosophy is reflected by its innovative “independent fit technology”.

Moreover, of course is a true feast for the senses – whether you focus on the details or on the chair as a whole. The material processing, control and adjustment elements, and the panels in fine veneer, high-gloss varnish or even Corian® emphasise the design’s aesthetic balance – for true appeal.

of course product family

Executive swivel chair, conference swivel chair

Characteristics

With its various height adjustment options, the temptation c desk range provides ergonomic solutions for all requirements and applications. The clear-cut design delivers first-class aesthetics and allows the technically different versions to be combined so as to create a uniform appearance.

The temptation c desk with motorised height adjustment offers maximum working comfort when both standing and sitting.

The height adjustment range of 650 to 1250 mm complies with the future standard, prEN 527-1. Pedestals of all depths have unlimited space below the desk.
