

Medical library, Careum

Architects: **GWJ Architekturen, Bern**

Medical library, Careum
Gloriastrasse
Zurich
Switzerland

Year built: 2004
Furniture:
flip flap, yeah, no limits

With its medical library, the Careum is a learning and information centre for clinical medicine, patient care and health sciences. Belonging to Zurich university's library, it also includes a study landscape with a collection of textbooks, specialist journals, reference works as well as an e-media library. 240 workstations are available to the users and visitors in the reading rooms, group-work rooms and skills labs.

All the library visitors sit on **yeah** or on **flip flap**.
