Sedus easy screen – privacy screens the easy way

Without the need to be system-compatible in any way, the new Sedus easy screens can be integrated into any workplace. Whether a single desk, double workstation or bench – the elements can be mounted on or behind the table top and in each case are available in two heights and many widths.

easy screen's simplicity stems from a simple universal adapter that allows attachment to any table top with a thickness of 19 to 25 mm. The easy screens are not only uncomplicated retrofit elements as privacy screens on the desktop, but also, in a higher version, with a combined modesty panel function.

The material structure of the 26 mm thick easy screens consists of three-layer chipboard with rounded corners, covered on both sides with fabric. All-round piping in black, white or white aluminium holds it all together. The entire colour range of selected Sedus fabric collections is available to choose from for the colour scheme.

Additional functions can be enabled by accessories such as a magnetic strip, organiser rail, magnetic whiteboard or pinboard.

Sedus is a leading office furniture manufacturer with headquarters and production facilities in Germany, eight subsidiaries in Europe and partners in 70 countries worldwide. Established in 1871, in its long history Sedus has constantly set new standards in product development and strategy for a more comfortable working environment for the benefit of individual employees and companies.
