

# Recommended disinfectants

Corona viruses are enveloped viruses. They are sensitive to many disinfectants. Products that have proven efficacy against enveloped viruses ("limited virucidal") are suitable for disinfection.

Products with an extended efficacy against viruses such as "limited virucidal PLUS" or "virucidal" are also suitable for disinfection.

[According to Robert Koch Institute [https://www.rki.de/DE/Content/InfAZ/N/Neuartiges\\_Coronavirus/Reinigung\\_Desinfektion.html](https://www.rki.de/DE/Content/InfAZ/N/Neuartiges_Coronavirus/Reinigung_Desinfektion.html)]

**PLEASE NOTE:**

We recommend to test the disinfectant on an inconspicuous area before using it on the entire surface.

Treating materials with disinfectants may have a negative effect on their durability and resilience.
